EDUCATION

<u>Vellore Institute of Technology</u>   Bhopal, India
BTech CSE specialisation in AIML   CGPA:8.69   2023- 2027
<u>Kendriya Vidyalaya OF Khamaria</u>   Jabalpur, India
Class XII   Percentage: 81.4%   2021-2022
Class X   Percentage: 87.6%   2019-2020

SKILLS

- **Language**: C++, Python, HTML, CSS, JavaScript
- **Tools**: MySQL, Microsoft Power Point
- **Technology:** Artificial Intelligence, DSA
- **Soft Skills:** Communication, Teamwork, Problem-solving, Time Management

---

PROJECTS

- **Vit Helpsphere**   **December 2024**
  Our project, "VIT HelpSphere," is a user-friendly website developed to simplify and expedite the process of raising complaints related to hostel and room issues. With a simple login system, students can easily submit their complaints, making the entire process fast, convenient, and accessible. As part of the team, my role involved designing and developing the Front-end of the website including project prototype. We built the website using MongoDB for the database, Nodejs for backend functionality, Streamlit for the front-end interface, and Scikit-learn for any data processing and machine learning tasks. Together, these technologies allowed us to create a seamless and efficient solution for the students

- **Personal Portfolio| [LINK](#)**   **May 2025**
  This is a fully responsive website built from scratch using HTML, CSS, and JavaScript. It showcases my projects, skills, and professional journey in a clean, user-friendly design.

CERTIFICATE

- **Fundamental of AI and ML (vityarthi)**   **26th April 2024**
  Completed an introductory course covering the core concepts of Artificial Intelligence and Machine Learning. Gained insights into supervised and unsupervised learning techniques and real-world applications.

- **Python Essentials (vityarthi)**   **16 December 2023**
  Acquired foundational knowledge of Python programming including data types, loops, functions, and file handling. Built small-scale programs to reinforce understanding of key concepts.

- **C++ Problem Solving (CodeChef)**   **12th July 2023**
  Focused on enhancing algorithmic thinking and competitive programming skills using C++. Solved a variety of coding problems on topics such as arrays, strings, and recursion.

- **Learn C++ (CodeChef)**   **10th July 2023**
  Completed a structured learning path on C++ syntax, data structures, and object-oriented programming. Developed hands-on experience through interactive coding challenges.

- **MATLAB Onramp (MathWorks)**   **20th August 2023**
  Introduced to MATLAB environment with emphasis on data analysis, visualization, and scripting. Built basic programs and performed mathematical computations using MATLAB tools.
